

Since my surgery I have experienced major improvements with bladder control and bowel movements. My incontinence issues have been resolved so I don't have any problems with "leakage"! My bowel movements are normal again and I don't have a rectum that bulges into my vagina.

A word about sex. Before the surgery, sex was embarrassing and uncomfortable for both me and my husband. Now, (after surgery) we are much happier and satisfied with this part of our relationship. We finally feel "normal" again.

Thanks to Dr Z. and his wonderful staff,

A satisfied patient
